

GEO AQ/CoP and OWS activities at

**Institute for Energy and Climate Research 8:
Troposphere (IEK-8)**

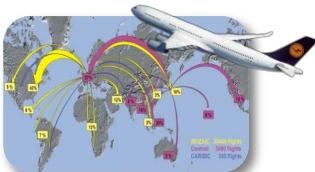

» Trace Gas and Aerosol Processes in the Troposphere

Martin Schultz

Institute mission

Trace gases and aerosol processes in the troposphere

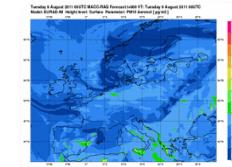

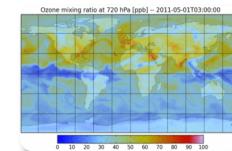

Observation

Simulation / Process Understanding

Numerical Modeling

Goal: establish the scientific basis for societal and political decisions on energy options, mitigation and adaptation strategies

GEO Activities of IEK-8

- Contributions to GEO work plan 2012-2015 (input to Phil Dickerson, HE-01)
- Co-Organisation of GEO AQ-CoP workshops
- Contributions to „AQ“ metadata definitions (Dublin workshop; Good practices document in preparation)
- Run and develop the AQ CoP interoperable WCS server (jointly with Rudy Husar and Kaari)
- Demonstrate interoperability through web applications (TFHTAP and MACC)
- Expand WCS-based air quality network in Europe

Co-chair GEO AQ CoP (mit R. Husar und G. Fowley)

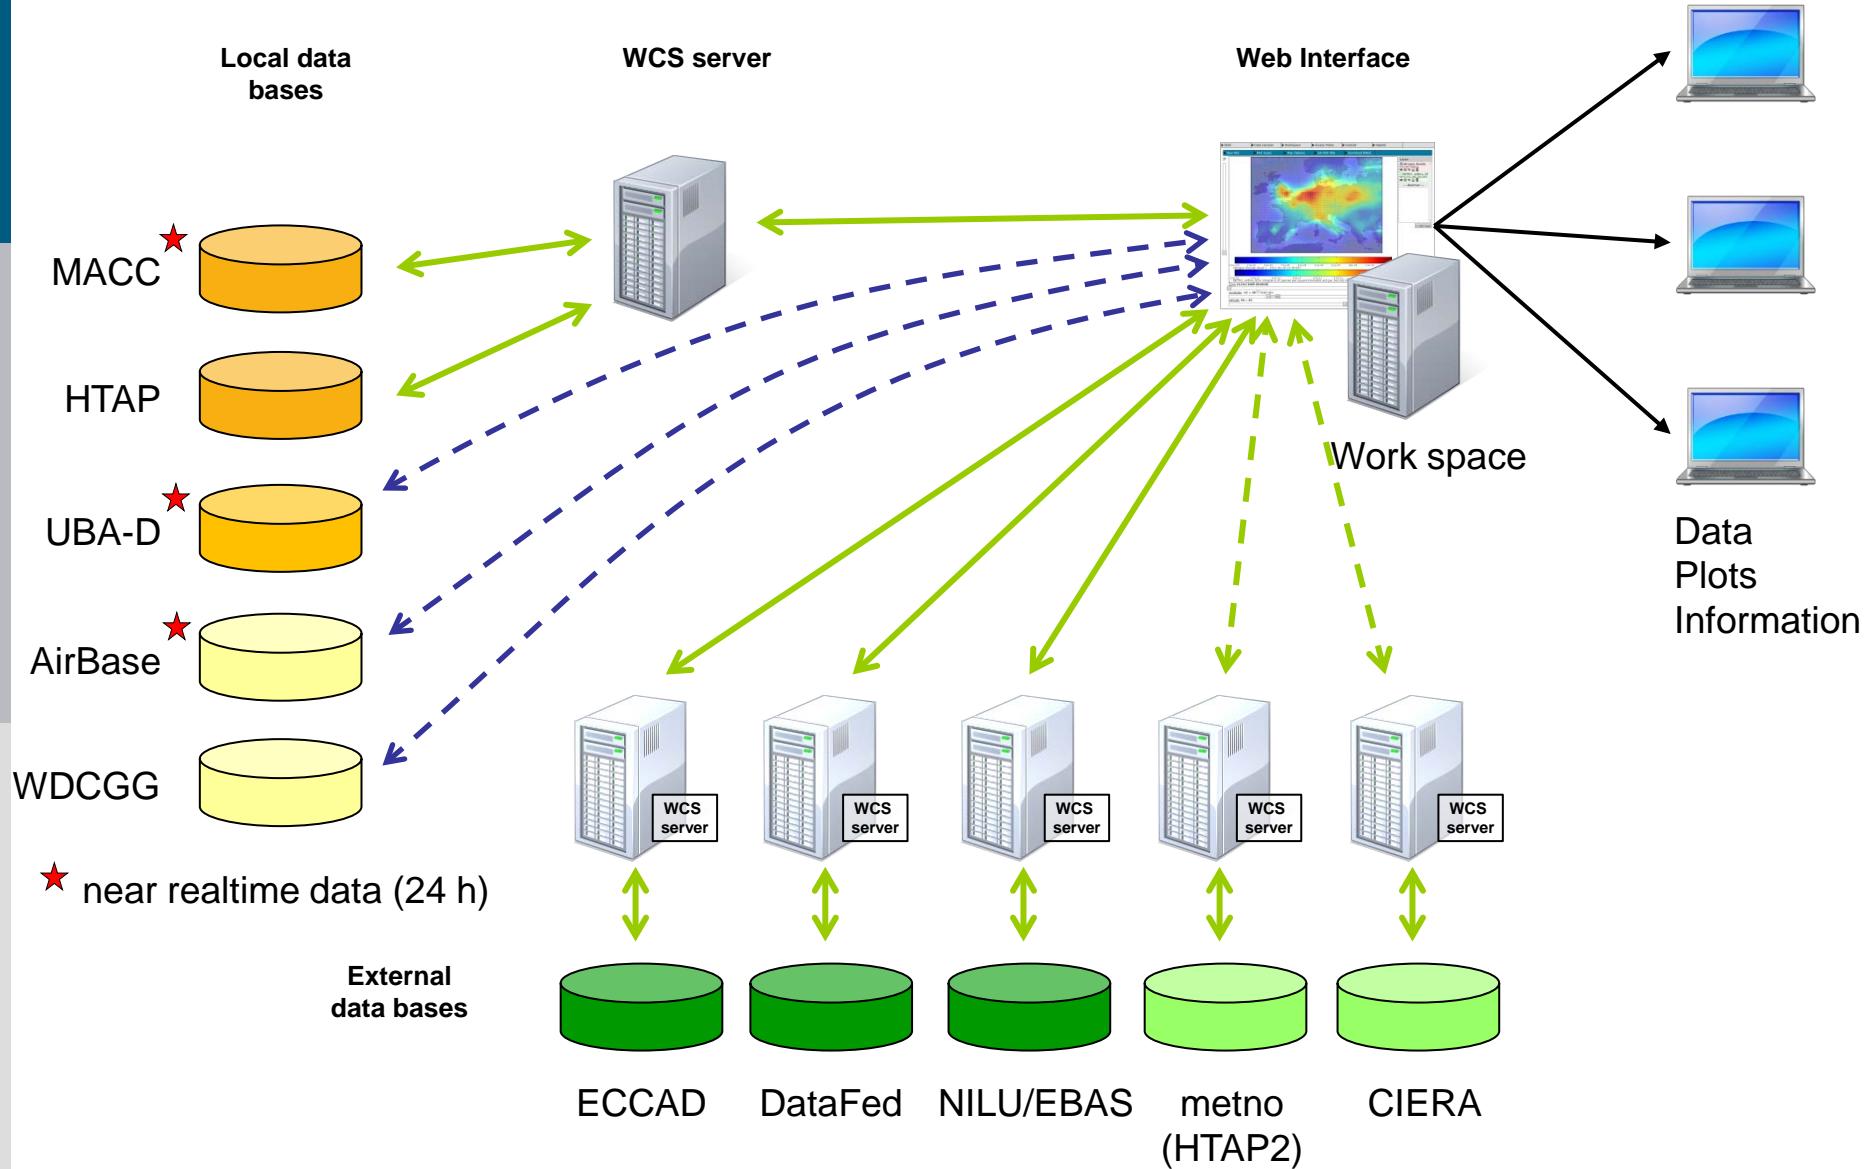

Workshop Daten-Netzwerk
Solta, Kroatien, August 2011

Workshop Metadaten
Dublin, Irland, September 2012

Focus:

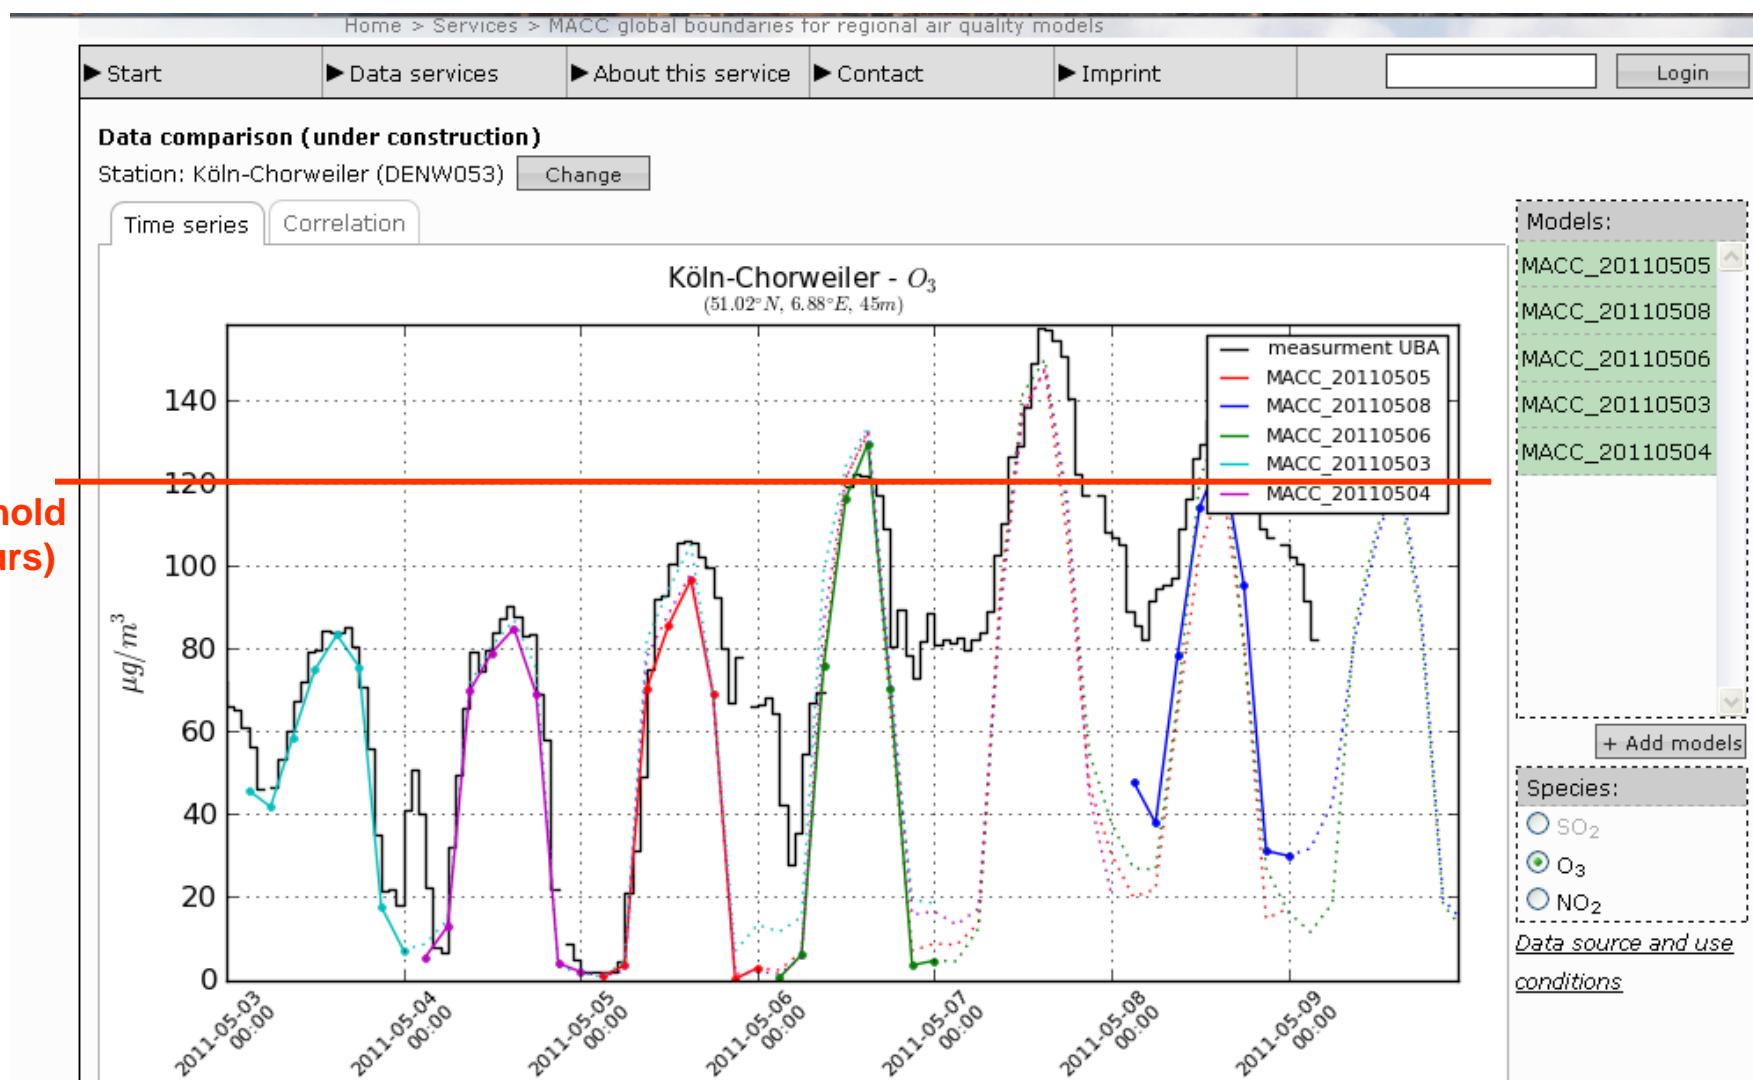

Make actual use of data (beyond straightforward „data provision“)

Linking external data sets not trivial
EVEN with uniform standards

Overlay of data fields (emissions and model fields)

Model-data comparisons

Next steps

- On request of MACC:
 - better user management
 - direct linking to specific data sets and views
 - consolidate metadata profile and publish metadata records
- On request of HTAP:
 - linkage to met.no server (new HTAP archive)
 - more model and data comparison tools
- Other:
 - restructuring and public release of core code
 - all kinds of enhancements
