

ESIP DSTCCP Catalog

Decision Support Tools Catalog and
Community of Practise

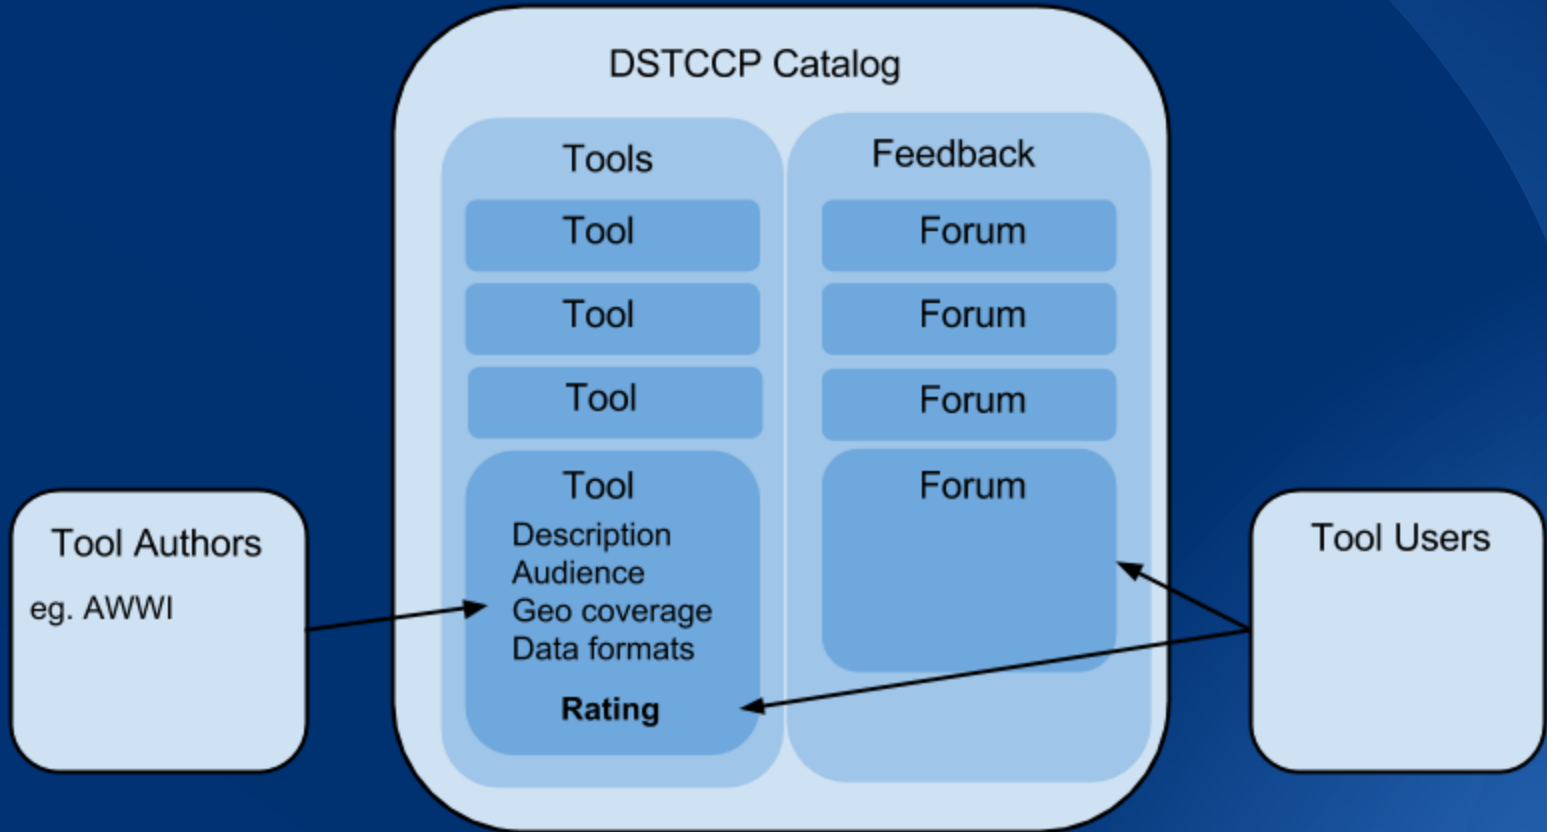

<http://dstccp.esipfed.org>

1. Aid discovery of decision tools
2. Facilitate discussion between tool authors and users

Version 1 (current)

New features / improvements

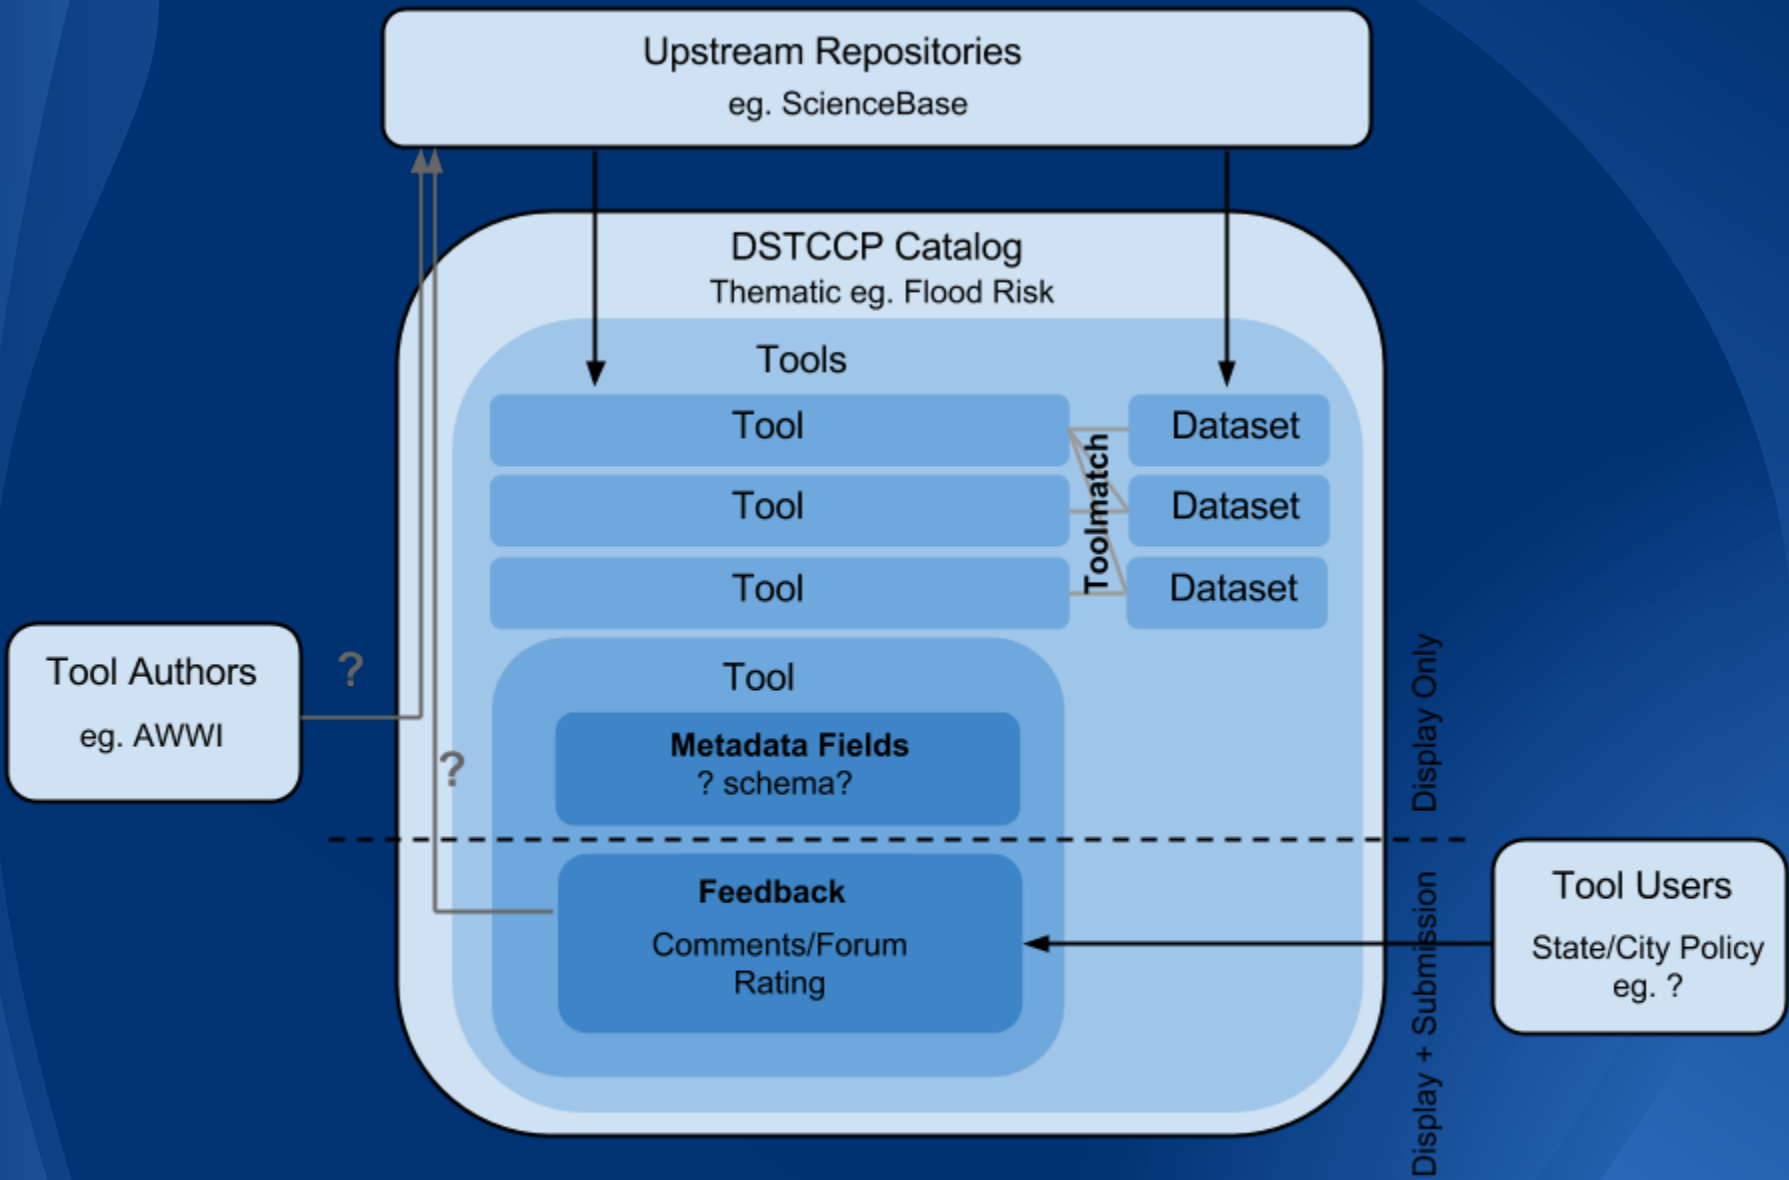

- > Thematic catalogs based on a Drupal template (eg. Flood Risk, Renewable Site Selection)**
- > Pull Tool metadata from upstream repositories, cached but no local editing or submissions**
- > Gather Tool user feedback and store locally**
- > UX: Display user feedback on Tool pages**

Version 2

Potential new features

- > **Push user feedback upstream to repositories**
- > **Local Tool submission directly to upstream repositories (user friendly interface)**
- > **Associate Tools with usable Datasets (use Toolmatch?) or other resources**

Version 2+

Questions / Discussion

Submissions

- > How to empower continued Tool submissions?
- > How to transition existing local Tool data to new upstream-only version?

Data schema

- > Which Tool metadata fields are relevant?
Mapping from upstream repositories?
- > Which fields are generic to all Themes (eg. Flood Risk), & are there any Theme-specific fields?
- > Is Toolmatch potentially usable & architecture?

Questions / Discussion

UX

- > **Better define users of DSTCCP**
- > **How best to gather feedback on DSTCCP itself?**
- > **Embed discussion within Tool pages, rather than as separate Forums?**
- > **Tool submission UX (if we provide it)**
