

Can you spare 30 minutes for Climate Literacy?

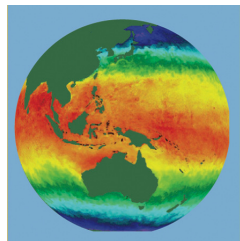

Needed:

Expert Science Reviews of
Climate Education Resources

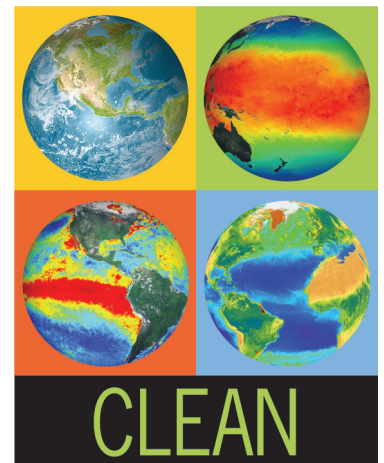

Where:

CLEAN Resource Review Station
@ ESIP Federation meeting - Santa Fe 2011

The Climate Literacy & Energy Awareness Network is building an online reviewed collection of climate education resources for students & teachers at middle & high school and college levels, and the general public.

You'll be making an important contribution to the teaching of climate literacy by helping us vet the science in these resources!

An NSF funded National Science Digital Library Pathway project.
